

# WASHING TIPS

## Remove dirt in advance

Remove loose dirt from the doormat by shaking, brushing or vacuuming.

## How do I put my mat in the washing machine?

Place the mat in the washing machine with the pile facing out loosely crumpled. This opens up the pile and allows it to be effectively washed and cleaned of dirt and debris all the way to the bottom of the pile. Place the mat in the washing machine with the pile facing out and loosely crumpled. This opens up the pile and allows it to be effectively washed and cleaned of dirt and debris all the way to the bottom of the pile.

## Use mild detergents sparingly

Only a little detergent is needed. Please always use a mild detergent and do not use fabric softener or bleach.

## Gentle wash

Washing at 40°C will thoroughly clean „ordinary“ soiling. For heavy soiling, we recommend using our highest possible temperature of 60°C; then spin the mat briefly on a low setting.

### Drying

Thanks to the functional properties of the mat's fibres, the mat is quickly ready for use again after air-drying. It is best to lay the mat flat on a clothes horse so that it dries from both sides and the rubber can relax after washing without changing shape.

If you need to dry your mat quickly, it can also be put in the dryer (Programme: easy-care or mixed fabrics). wash+dry mats should never be left in the electrical appliances longer than necessary after the end of the programme to prevent permanent deformation.

wash+dry mats should be cleaned 3 to 4 times a year, or more frequently if they are heavily used. This gentle washing process also cares for the rubber backing and helps to retain its anti-slip properties.

By following these simple washing tips, the environmental impact of your mat is minimised as its life is extended. Durable products are very much in the spirit of sustainability, as their manufacture consumes most of the energy in a product's life cycle.

Protect the  
environment  
and wash at  
40°C.
